

Payeer for CMS Joomla 3.6.5 – JoomShopping 4.15.1

In the admin panel, open “Components -> JoomShopping -> Install & Update”.

Select the archive payeer.zip and click “Upload”.

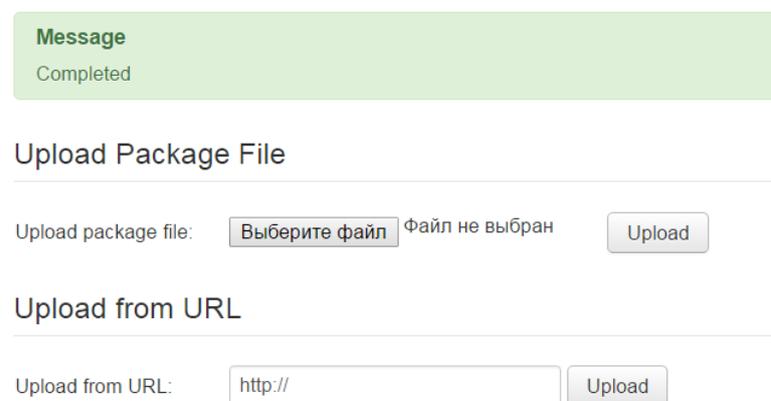

Upload Package File

Upload package file: payeer.zip

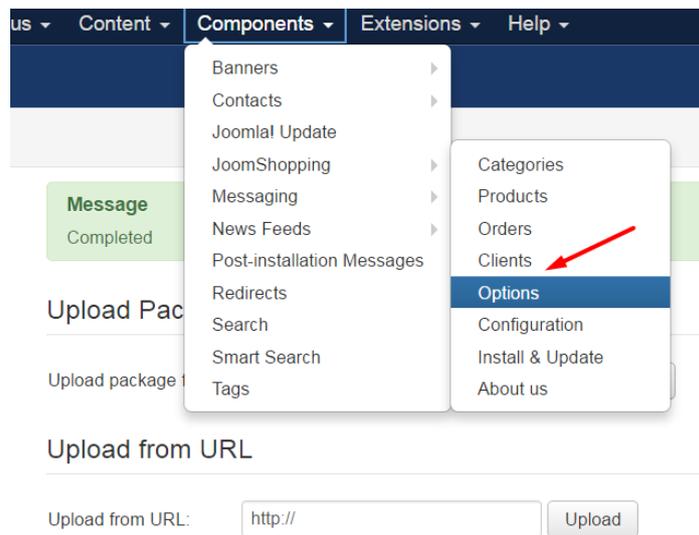

Upload from URL

Upload from URL:

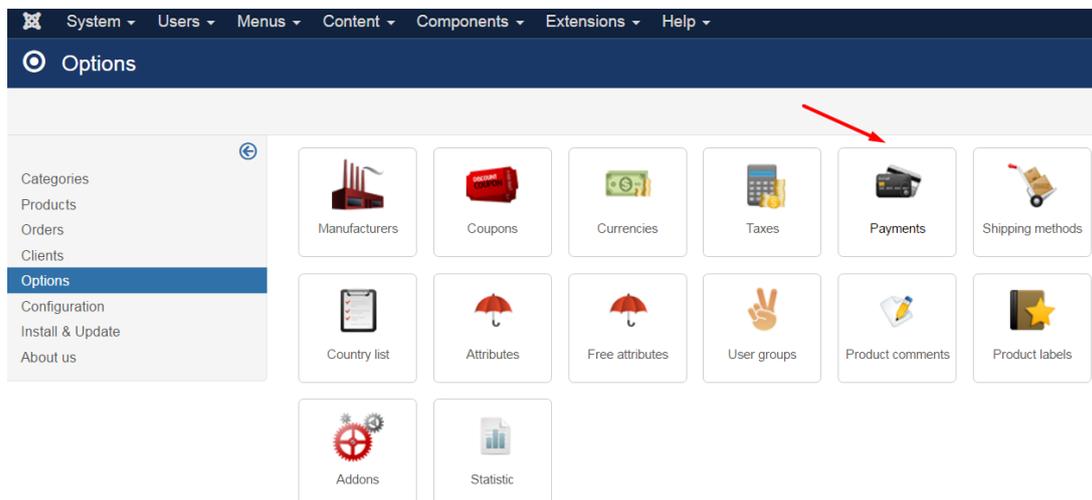

After installation you should see the success notification.

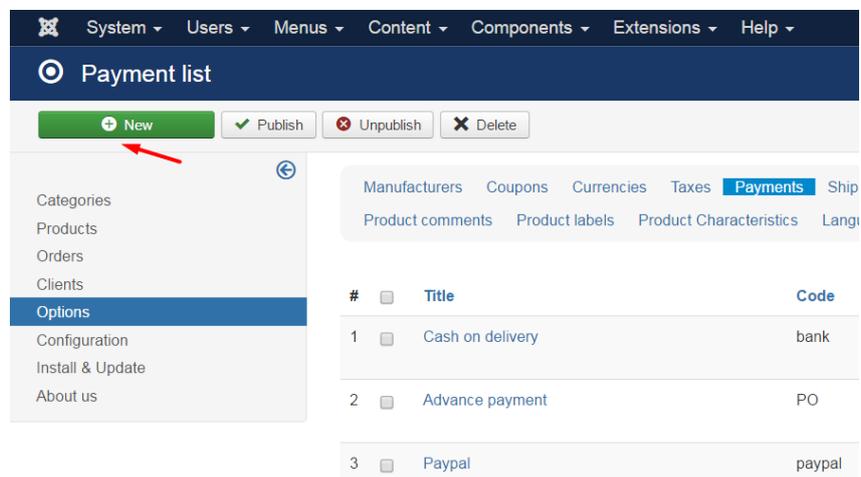

Open the JoomShopping plugin options by going to “Components -> JoomShopping -> Options”.

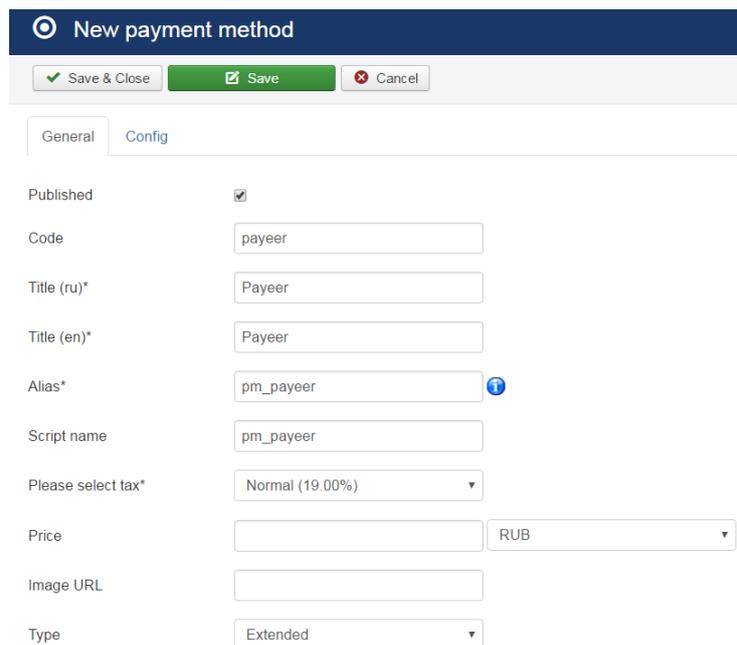

Click the “Payments”.

In the list of payments, click “New”.

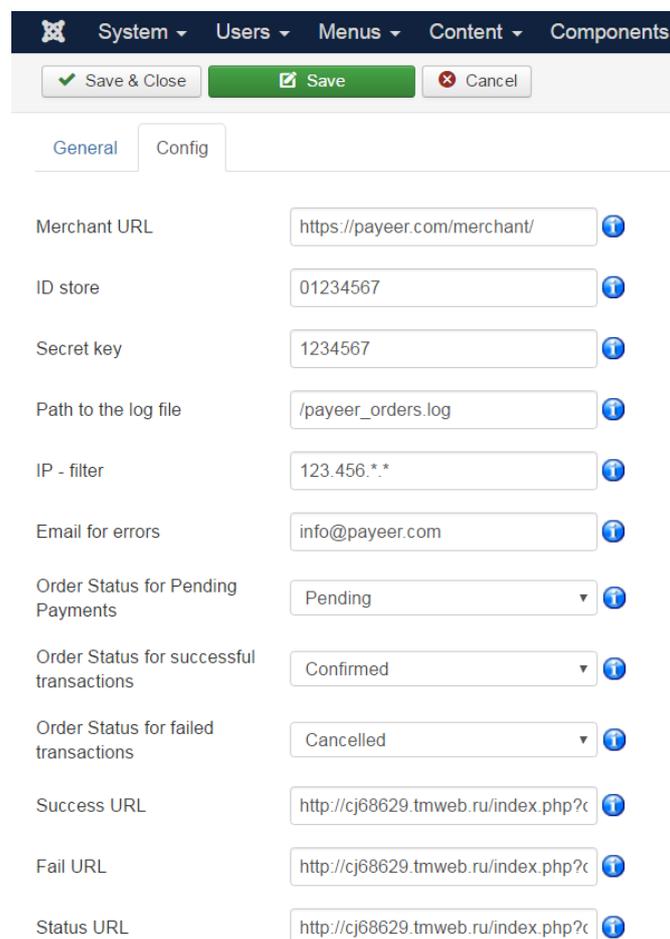

In the form create a new payment check the box next to the “Published”, enter the code payeer and titles for all languages of the site (Payeer), alias and script name (pm_payeer). Be sure to specify the type of payment – extended. Below you can enter a description for this payment method and specify additional settings. After this save the settings and go to the tab “Config”.

The screenshot shows the 'New payment method' form with the 'General' tab selected. The form includes a header with a back arrow, the title 'New payment method', and three buttons: 'Save & Close', 'Save', and 'Cancel'. Below the header are two tabs: 'General' and 'Config'. The form fields are as follows:

Published	<input checked="" type="checkbox"/>
Code	<input type="text" value="payeer"/>
Title (ru)*	<input type="text" value="Payeer"/>
Title (en)*	<input type="text" value="Payeer"/>
Alias*	<input type="text" value="pm_payeer"/> ⓘ
Script name	<input type="text" value="pm_payeer"/>
Please select tax*	<input type="text" value="Normal (19.00%)"/>
Price	<input type="text"/> RUB <input type="text"/>
Image URL	<input type="text"/>
Type	<input type="text" value="Extended"/>

In the configuration tab, specify the settings of the payment system Payeer.

The screenshot shows the 'New payment method' form with the 'Config' tab selected. The form includes a header with a back arrow, the title 'New payment method', and three buttons: 'Save & Close', 'Save', and 'Cancel'. Below the header are two tabs: 'General' and 'Config'. The form fields are as follows:

Merchant URL	<input type="text" value="https://payeer.com/merchant/"/> ⓘ
ID store	<input type="text" value="01234567"/> ⓘ
Secret key	<input type="text" value="1234567"/> ⓘ
Path to the log file	<input type="text" value="/payeer_orders.log"/> ⓘ
IP - filter	<input type="text" value="123.456.*"/> ⓘ

Order Status for successful transactions	<input type="text" value="Confirmed"/> ⓘ
Order Status for failed transactions	<input type="text" value="Cancelled"/> ⓘ
Success URL	<input type="text" value="http://cj68629.tmweb.ru/index.php?c"/> ⓘ
Fail URL	<input type="text" value="http://cj68629.tmweb.ru/index.php?c"/> ⓘ
Status URL	<input type="text" value="http://cj68629.tmweb.ru/index.php?c"/> ⓘ

Merchant URL: the default path to the payment <https://payeer.com/merchant/>

Merchant ID: id of your store in the system Payeer.com (can be found in the personal cabinet).

Secret key: the secret key of your store, also issued to you when registering in the system.

The path to the log file: if you specify the path to the file logging, you will be recording information about payments via Payeer.

IP filter: You can specify the list of all trusted ip addresses of servers, separated by commas. You can also specify a mask instead of the ip address. If the field is empty, checking for trusted ip addresses is not performed.

For example:

192.168.71.87, 192.165.83.17, 192.178.34.15

Or 192.*.71.87, 192.165.83.*, 192.*.34.15

Or *.*.*.* - all available ip addresses

Email for warning send: enter your email address to receive notices in the event of an error of payment. The letter will state the reason and basic information about the payment.

Specify the status of orders payment:

- 1) Order status for pending payments;
- 2) Order status for successful transactions;
- 3) Order status for failed transactions.

Click "Save".

Then on the website payeer.com in the dashboard, enter the URL in the store settings. Data URLs can be found and copied in the tab "Configuration" in the module settings Payeer.

Success URL	<input type="text" value="http://cj68629.tmweb.ru/index.php?c"/>	
Fail URL	<input type="text" value="http://cj68629.tmweb.ru/index.php?c"/>	
Status URL	<input type="text" value="http://cj68629.tmweb.ru/index.php?c"/>
